

Rojin Al-Kurdi

Flutter Developer

Flutter Developer with 3 years in e-commerce, education, live streaming, and enterprise apps, delivering 7+ mobile projects from concept to launch. Led a team as Product Owner, driving feature planning and execution while ensuring scalable, responsive, and user-focused solutions through clean architecture and optimized UI/UX.

WORK EXPERIENCE

YS Lootah Tech — Dubai

QA Engineer · full-time (08/2025 - Present)

- **Led** comprehensive testing for mobile and web applications in the insurance and advertising sectors, ensuring seamless functionality and high-quality user experiences.
- **Designed** and executed detailed test plans, identified and reported critical bugs, and collaborated closely with developers and stakeholders to deliver stable, high-performing releases.
- **Reduced** major defects by 45% and improved overall release stability and app performance through effective QA strategies and continuous process enhancements.

Boost Solutions L.L.C — Damascus

Flutter Developer & Team Leader · full-time (08/2024 - 08/2025)

- **Led** the development of two large-scale mobile applications in the insurance and advertising sectors, managing the projects end-to-end while coordinating with stakeholders.
- **Directed** architecture planning, task allocation, and code reviews, improving app loading times by 60% and reducing crash rates by 45% to ensure scalability and high performance.

Novech L.L.C - Flutter Developer · Full-time (10/2023 - 08/2024)

- **Implemented** two mobile applications, **Fanoos** (e-commerce, selling & booking) and **Schooly** (education), using Flutter, BLoC state management, and Clean Architecture, serving hundreds of active users after launch
- **Led** requirement-gathering sessions with clients, capturing over 90% of stakeholder needs and aligning them with technical capabilities, which expedited project approval by 20%.
- **Partnered** with a cross-functional team of 6 members to refine requirements, align features with business goals, and ensure smooth integration with backend services.
- **Optimized** onboarding flows and application performance, reducing startup time by approximately 15% and improving navigation responsiveness based on internal testing results.

- Volunteer Management

EDUCATION

Damascus University

Bachelor of Computer

Engineering

Computer Science

Damascus, Syria 10/2018 —

09/2023

Asr Al-Reyadeh Group - Flutter Developer · Part-time (02/2022 - 09/2024)

- **Launched** Shop Live, a livestream-based e-commerce mobile app enabling synchronous vendor-client engagement, customers, and marketers, and published it on [Google Play](#).
- **Partnered** with business and marketing teams to define features, set priorities, and ensure a smooth, high-quality launch experience.
- **Applied** technical expertise to support marketing in post-launch campaigns, boosting app reach by 18% and user engagement by 22% within two months.

PROJECTS

E-Claim (Boost Solutions L.L.C) (08/2024 - 06/2025)

- **Built** a comprehensive car accident insurance application, enabling users to submit claims efficiently by uploading photos and adding detailed incident summaries.
- **Reduced** manual claim processing time by approximately 30% through digital workflows and automated tracking.
- **Customized** instant notifications for claim status updates improve transparency and user satisfaction.
- **Engineered** with Flutter, integrating BLoC for state management, Clean Architecture, and RESTful APIs to ensure seamless compatibility and optimized performance.

Go-Public (Boost Solutions L.L.C) (08/2024 - 07/2025)

- **Created** an integrated media services platform for booking advertising campaigns across SMS, billboards, TV, and radio channels.
- **Streamlined** booking workflows, reducing administrative effort by an estimated 25% and improving operational efficiency.
- **Integrated** FATOURA payment gateway, enabling secure online transactions and reducing manual payment processing time by approximately 25%.
- **Constructed** on Flutter, employing BLoC state management and Clean Architecture principles to guarantee robust scalability and long-term maintainability.

Yalla Shop Live (Asr Al-reyadeh Group) (02/2022 - 09/2024)

- **Released** on [Google Play](#), this live-commerce mobile application enhances real-time interaction between sellers, buyers, and marketers.
- **Introduced** interactive features such as live shopping, product previews, and user wallet functions, increasing user engagement by 40%.
- **Produced** demo videos to showcase key features, supporting marketing efforts, and increasing app awareness.
- **Improved** onboarding flow based on user feedback, resulting in better app visibility and higher store ratings.
